Reasons For Allowance

The closest prior art reference is Kamiya et. al. (See Reference A). The difference between the Kamiya compound and the instantly claimed compound is the value of the n moiety. In the instant compound, then moiety can not be equal to zero, but must be 1 or 2. In the Kamiya compound, the n moiety is zero. At column 36, lines

29-30, see

The Kamiya compound is a homologue of the instant compound. However, since the Kamiya compound has no use and is only a synthetic preparation, it would not have been obvious to one of ordinary skill in the art to modify this homologue to obtain the instant compound. The prior art reference does not teach nor suggest to one of ordinary skill in the art how to modify the prior art compound to derive the instant compound.

Accordingly, the instant claims are allowable therefrom. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binta M. Robinson whose telephone number is (571) 272-0692. The examiner can normally be reached on M-F (9:30-6:00).
